

VISHWAK TUMMALA

DESIGN STUDENT

I'm a passionate UI/UX designer with a keen eye for aesthetics and functionality. Through my exceptional skills, I strive to create intuitive and visually stunning user experiences that delight and engage. However, my aspirations extend beyond the realm of interface design. I harbor a deep-seated fascination for the world of VFX and animation, where I see endless opportunities for creativity and innovation. Pursuing a master's in VFX and animation would not only allow me to further hone my skills but also open doors to a whole new realm of possibilities where I can bring my imagination to life in dynamic and immersive ways.

- Web Design

Experience

UI/UX Designer

CybroSphere solutions Feb 7 2024 - May 27 2024

As an intern UI/UX designer at CybroSphere Solutions, I collaborate with the design team to create intuitive and user-friendly interfaces for our digital products. Over the course of three months, I am honing my skills in wireframing, prototyping, and user testing to contribute to the development of engaging and seamless user experiences.
